**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 20-25, drawn to a stand requiring a specific channel defined in the platform under where the vacuum bag sealing apparatus is positioned, classified in class 53, subclass 512.
  - II. Claims 1-19 and 26-33, drawn to a device to assist in the creation of vacuum bags, classified in class 53, subclass 513.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a specific channel defined in the platform under where the vacuum bag sealing apparatus is adapted to be positioned. The subcombination has separate utility such as in an apparatus requiring a defined channel in the platform.

2. A telephone call was made to Sheldon Meyer on 03/03/2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
